

# physioview™

The latest addition to the  
**Brands That Perform™**

REDEFINING THE HOME EXERCISE PROGRAM

Extend your professionalism

Provide your patients with the tools for a better at home instructional experience.

*Physioview™ became the latest addition to the **Brands that Perform™** when **North Coast Medical, Inc.** acquired it in 2012. As a practice owner, **Angela Wilson Pennisi, PT, MA, OCS**, originally developed **Physioview™** in 2004 out of the desire to eliminate line drawings as a source of patient instruction. Relying on her own experience, extensive research and the input from other practitioners, Angela was one of the first to provide an online database rich with customized professional exercise content accessible by the patient.*

**Phone:** 866.640.8439

**Email:** customerservice@physioview.com

Close to 1000 contemporary exercises created by therapists for therapists.  
Upload media and instructions to create customized home exercise programs.  
Custom clinic branded Physioview™ pages provide a personalized point of differentiation.  
Password protected login preserves privacy and enables patient access anytime.

***Creating individualized patient home exercise programs has never been easier or more personal.***

**Physioview™** is a dynamic online exercise database of rehabilitative exercises complete with professional photographs, audio, video and text. The Integration of visual and auditory content accommodates various patient learning styles and builds patient confidence in knowing how to perform exercises correctly away from the guidance of their therapist.

**Physioview™** empowers providers by helping to guide their patient's progress outside the clinic environment with a simple click of the mouse. With unlimited access, therapists can customize personal treatment plans for their patients by modifying exercises or uploading their own content.

Included with each subscription is the ability to upload your clinic logo to extend brand presence and patient familiarity throughout the website and printed materials. We invite you to begin branding your home exercise programs with a complementary full version, no obligation, **90-day trial** by visiting [www.physioview.com](http://www.physioview.com).

*Subscriptions as low as \$2.95 a month per user.*
