# Ortho Thermic™

THERAPEUTIC  
PAIN RELIEF

## Thumb CMC Restriction Splint

## Soothing Comfort

Provides support and warmth for the thumb CMC joint.

Features a moldable metal stay for enhanced support  
at the thumb's base.

Silicon beads on outer glove surface improve gripping ability.  
Heat-generating antimicrobial liner.

# THERMOPLASTICS

North Coast Medical provides an array of thermoplastic splinting materials to fit all splinting needs. Our thermoplastic materials exhibit various resistance to stretch, memory and drape to facilitate various custom orthotic fabrication.

## Degrees of Resistance to Stretch (RTS)

Minimum

Resistance to Stretch (RTS)

Maximum

RTS	Thermoplastic	Handling Technique	Clinical Application
<b>Minimum</b>	Clinic®	<b>Minimum RTS:</b> Use light touch or the pull of gravity for an intimate fit. Minimum pressure required to stretch the material.	<b>Minimum RTS:</b> Use for smaller hand and wrist orthoses or when a patient can be placed in the desired position. Ideal for post-surgical and arthritis orthoses.
<b>Minimum to Moderate</b>	Orfit® Natural NS Orfit® Colors NS Orfit® Classic Orflight™ Encore™ Preferred® Preferred® Black		
<b>Moderate</b>	Armour™ Vanilla™ Spectrum™ Prism™	<b>Moderate RTS:</b> Use a moderate amount of pull to conform the material to the body part without leaving marks. Requires moderate pressure to stretch the material.	<b>Moderate RTS:</b> Use for all types of orthoses, i.e., fingers, elbow, wrist, ankle, trunk, knee immobilizers and foot drop orthoses. An experienced splinter can use this type of material most effectively. Inexperienced splinters find this material more forgiving and user friendly.
<b>Moderate to Maximum</b>	Omega™ Max Solaris™	<b>Maximum RTS:</b> Use firm handling to contour. The material may need to be held in place as it cools. Material resists fingerprints and marks. Requires heavy pressure to stretch the material.	<b>Maximum RTS:</b> Use for larger orthoses, i.e., the elbow, shoulder, lower extremity and trunk. Ideal for spasticity or abnormal tone and joint contractures. Inexperienced or heavy-handed splinters will appreciate this characteristic.
<b>Maximum</b>	Omega™ Plus Omega™ Black

## Our most versatile splinting material.

### Resistance to Stretch

- **Minimum to moderate resistance to stretch.**
- Tolerates minimum to moderate handling during splint molding.
- Handle on a horizontal plane and form splint in a gravity-assisted position.
- Gentle, smooth motions yield superior results.

### Drape

- **Moderate drape** with only light to moderate pressure.
- Contours are quick to form.

### Memory

- **Minimum to moderate memory.**
- Splints can be modified a few times without thinning.
- Requires less handling and maintains contours while cooling.

### Rigidity

- Molded splints have a **moderate rigidity**.
- A circumferential splint is flexible enough for easy donning and doffing, yet strong enough for immobilization.

### Bonding

- The unique **environmentally friendly coating** gives a tacky feel that helps hold the material in place, without thinning or stretching out of control.
- A wet bond will hold but can be pulled apart once cooled.
- Dry heating two surfaces will form a strong bond. For a permanent bond, remove coating with an emery cloth and apply dry heat, then press together firmly. Solvent not required.

Thickness Guide		
1/8"		3.2 mm
3/32"		2.4 mm

Perforation Guide	
• Smooth	
• Perforated, 1%	

### Surface Finish

- **Moderate resistance to fingerprints** and resists showing stains.
- **Smooth, self-sealing** cut edges remain sealed even after reheating.

### Applications

- **1/8" Preferred®** can be used for almost any splinting application. Use for dynamic and static splinting; for adult and pediatric positioning; and for post-burn and post-surgical care.
- **3/32" Preferred®** is thin and lightweight, yet strong, and can be used for forearm and hand-based splints. Ideal for arthritis splints, post-operative splints, and for pediatric splints when children are able to cooperate.

### Working Time (1/8")

- Allows three to five minutes of molding time after softening in 160° F (71° C) water.

**Not made with natural rubber latex.**

# BUILT to LAST

## **Resistance to Stretch**

- Moderate resistance to stretch.

## **Drape**

- Moderate drape for excellent fit and conformability.

## **Memory**

- 100% memory for easy remolding.

## **Rigidity**

- Maximum rigidity. Orthoses will hold their shape against hypertonicity.

## **Bonding**

- **Coated material.** Provides a tacky surface when warm and bonds without the need for solvents.
- A firm bond is achieved by roughing one of the surfaces lightly with sandpaper, or using the blade of scissors to score the surface. Use a heat gun to heat the surface until thermoplastic is tacky, then press both surfaces together until thermoplastic has cooled.
- For a permanent bond, score and heat both surfaces with a heat gun, then press together.

## **Surface Finish**

- Resists fingerprints.
- Smooth, self-sealing edges remain sealed even after cutting and reheating.

## **Applications**

- **1/8" Armour™** can be used for arm, wrist, and circumferential splinting applications. Ideal for abnormal tone or joint contractures.
- **3/32" Armour™** is thin and lightweight, yet strong and durable. Ideal for forearm, hand, and finger-based splints.

## **Working Time (1/8")**

- Allows two to three minutes of molding time after softening in 160° (71° C) water.

**Not made with natural rubber latex.**

# Splint-Form™ 1000

Conveniently sized pan is ideal for use in clinical and institutional settings.

**Splint-Form™ 1000**  
NC14600

- Splint-Form™ 1000 Heating Pan warms up quickly and maintains water temperature between 90° to 190°F (32° to 88°C). Heating elements remain operable even if water evaporates completely.
- Includes a 6" (15 cm) deep, perforated stainless steel insert pan with lid.
- Features a single 700 watt heating element. Pan operates at 120 volts and is UL and CSA approved.
- Inside dimensions with insert: 20" x 12" x 6" (51 x 30 x 15 cm).
- Outside dimensions: 21½" x 13½" x 9" (55 x 34 x 23 cm).
- Includes a one-year warranty.

## Splint Pan Netting

*Ideal for safely removing thermoplastics from warm water.*

- Nonstick coated Splint Pan Netting prevents thermoplastics from sticking to splint pans.
- Can be cut to fit the inside measurement of most splint pans.
- Sold in packs of 2. Measures 20" x 30" (51 x 76 cm).

**Splint Pan Netting**  
NC12800-2

# NEOLOOP™

## Straps and Sheets

Ideal for fabricating custom positioning splints, devices or padded handles.

- Features plush loop pile on one side and nylon lining on the other.
- Loop pile covering easily adheres to hook fasteners for strapping applications.
- Use hook strap to secure Neoloop™ around a body part, device or handle.
- Available in beige or black **straps** and **sheets**.

*Not made with natural rubber latex.*

# Self-Adhesive Dema Wrap®

**Economical and lightweight  
cohesive wrap provides excellent  
support and compression.**

*Make quick  
and easy light  
compression  
wraps.*

- Use to support sprains/strains and to apply compression for edema restriction.
- Use as a bandage and as a replacement for tape when securing dressings/catheters.
- Sticks to itself and stays in place without irritating the skin.
- Variety of width options ensure an ideal fit for select areas.
- Rolls measure 5 yds. (4.6 m) long.
- Beige color is available in both Standard and Latex Free\* varieties.
- All Color Packs are Latex Free\*.

*Secure splints while providing  
edema compression.*

*Self adheres and will not  
stick to skin, hair or clothing.*

*\* Not made  
with natural  
rubber latex.*

*No scissors required.*

# Outriggers

## Phoenix<sup>®</sup> & Base 2<sup>™</sup>

**Back in Stock!**

- For fabrication of dynamic and static progressive splints.
- Available in convenient kits or separate components to create customized contoured outriggers.
- Lightweight aluminum components can be bent by hand or with pliers.
- Wing nuts, thumb screws and line guides made from nylon and stainless steel.
- Finger slings are made of ultra-suede and are available pre-tied or with grommets.

# GLADIATOR™

## Superior Grade Materials

**Premium Italian Fabrics**  
for style and comfort

**Anti-Slip Beads**  
for traction and a secure fit

## Wrist & Thumb Orthosis

*Wrist model also available.*

## Biomechanical Advantage

- Counterforce straps
- Formfitting
- 2/3 forearm length
- Removable stays
- Breathable
- Lightweight

**Perforated Ariaprene®**  
provides comfortable compression and breathability

**D-Rings**  
anodized aluminum for added strength

**Low Profile Hook**  
injection molded featuring easy pull tabs

## Distal Strap

extra-long, customizable strap can be cut to specific length for optimal support. Two-sided hook fastener attaches easily to strap.

**Bicep Cutout**  
allows for active range of motion

*"Gladiator is designed to comfortably protect post-surgical and chronic wrist disorders. The unique bio-mechanical design allows the physician to provide a custom fit while maximizing occupational function."*

- Greg Pitts, OTD, MSOTR/L, CHT

# NEW COLORS GREAT QUALITY SAFETY-SEALED CONTAINERS

## Rainbow™ EXERCISE PUTTY

**Promote hand-muscle strength  
and increase endurance.**

- Exercising with Rainbow™ Exercise Putty helps promote increased range of motion, finger-flexion and tendon-gliding.
- Rainbow™ color-coded system associates resistance levels with color.
- The smaller portion cups are perfect for most small and medium sized hands.
- Composed of silicon rubber.

\* Not made with natural rubber latex.

# HOOK ROLLER.™

A massage roller intricately designed for the hand or arm.

Use for focused muscle release.

Warm up in the microwave for heated massage rolling.

Chill in the freezer for cool rolling.

Use vertically for targeted trigger point or knot release.

Designed with a flat end and textured end for different levels of release when used vertically.

Made with high-grade medical silicone.

Wash with soapy water.

Dimensions: 6" x 2".

Weight: 4 lbs.

**NC53136** Hook Roller

or call **800.821.9319**

# HOOK SPLINT.®

A sleek, low profile Relative Motion Orthosis.  
Relative motion made extremely simple.

Secure a custom fit with  
adjustable locking tabs.

Relative motion is a technique which places one or more fingers in a relatively extended or flexed position compared to the others.

Allows the entire hand to stay functional while achieving treatment objectives.

Formed by a metallic band with a smooth silicone finish, and a locking tab on each end.

Designed as a ready-to-use alternative to thermoplastics.

Waterproof, UV coating protects the outer surface and ensures long-term patient comfort.

#### Indications include:

Extensor tendon/sagittal band repair, PIP extension or flexion contracture, boutonniere deformity, trigger finger, Dupuytren's disease, tendon adhesions, digit pain/stiffness.

# Finger Extension Tube

Reduce flexion contractures.

- The shape and design of the Norco® Finger Extension Tube provides a low stress, high duration capability, ideal for flexion contractures.
- Circumferential pressure helps restrict fluid to aid in edema reduction.
- Tip of the finger should be visible. If needed, trim either end.
- Orthotic should fit comfortably, a firm fit is not required for effective results.
- Not recommended for flexion contractures greater than 50°.
- Made of dense neoprene, polyester, and poly/cotton tape.
- Not made with natural rubber latex.

*Poly/cotton tape provides comfort and durability.*

	Size	PIP Joint Circumference	
NC79068-1	X-Small	1¾" to 2"	(4.5 to 5.1 cm)

# Thumb CMC Restriction Splint

Lightweight, comfortable support.

All Comfort Cool® products are made of a unique, perforated neoprene material lined with soft terry cloth featuring anti-microbial technology.

Comfort Cool® products are an innovative combination of design and materials that make them the best choice for comfort and compliance.

The perforated neoprene material offers soft cushioning for comfort; perforations provide ventilation for more breathability while the terry cloth lining helps keep skin cool.

Provides direct support for the thumb CMC joint while allowing full finger function.

- Patented contoured neoprene strap wraps around the thumb CMC joint and the first metacarpal for direct CMC joint support.
- Specifically designed for osteoarthritis and medial subluxation of the thumb CMC joint.
- Reinforced stitching allows the splint to be trimmed below the thumb MP joint if desired.
- Provides gentle compression that helps relieve thumb discomfort associated with CMC joint arthritis and/or instability, tendinitis or repetitive motion.
- Made of thin, 1/16" (1.6 mm) perforated neoprene with a terry cloth liner that helps keep skin cool and comfortable.
- Plus sizes are a half size bigger in the hand and a full size larger in thumb circumference to accommodate enlarged thumb conditions.
- Not made with natural rubber latex.

# Wired Technology

## ADVANTAGES

- Conforms extremely well to uneven treatment sites.
- Maximum strength, precise buffering with new Carbon-Ag/AgCl technology.
- Large ground electrode surface area lowers sensation and increases comfort.
- Highly absorbant drug matrix.
- Large surface adhesion area.

## TRIVARION® IS AVAILABLE IN THE FOLLOWING SIZES:

SMALL 1.5cc  
NC89180B

MEDIUM 2.0cc  
NC89181B

LARGE 3.5cc  
NC89182B

TRIVARION®  
BUTTERFLY

MEDIUM 2.0cc  
NC89183B

## ADVANTAGES

- Two controls operate dose and current, with optional push-knob or turn capabilities.
- High-contrast display indicates dose, time and current.
- More power than dual-channel devices for better penetration; up to 80 volts.
- Automatic current ramp-up and ramp-down for maximum comfort. Dose range from 0 to 80 mA-min with 0.1 mA-min increments.
- Time calculations are performed automatically and recalculated if dose and current settings are changed, or with pause/restart.

ActivaDose® II Controller

# Buffered Iontophoretic Delivery Kit

*Each electrode has a large surface adhesion area.*

**Variety of sizes and shapes offer great flexibility for iontophoresis treatments.**

- Made of non-sensitizing, hypoallergenic, medical grade materials.
- Delivers ions with a pH balance up to 80 mA-min.
- Maximum strength, precise buffering with unique carbon- Ag/AgCl technology.
- The highly absorbent drug matrix has no messy hydrogel.
- Large ground electrode surface area lowers sensation and increases comfort.
- Each kit contains 12 individual treatment sessions that include: one activity electrode; one return electrode; one alcohol prep pad.

**Flexible. Thin. Contouring. Comfortable.**

*Competitor's product is not as thin or flexible.*

*Advanced, technology-based manufacturing for a thinner, more pliable electrode.*

*Easy-to-open packaging.*

**Not made with natural rubber latex.**

**Small**  
**Square 1.5 cc**  
NC89250B

**Medium**  
**Square 2.5 cc**  
NC89251B

**Large**  
**Square 4.0 cc**  
NC89252B

**Butterfly 2.0 cc**  
NC89255B

# Virtual Showroom

E-COMMERCE AFFILIATE PROGRAM

Join the Affiliate Program. Get an instant **online store**.

**Virtual Showroom™** is an easy to install, fully-functional e-commerce platform designed specifically for rehab healthcare providers. Virtual Showroom™ integrates seamlessly into your existing website and gives your clients direct access to the products their therapists have recommended. It is simple to create your own Virtual Showroom™ and it requires no programming skills.

## *Highlights:*

- Clients stay on your website when shopping for recommended products.
- Customizable: Select Featured Products, Categories, and color-match to your website.
  - Adapts to mobile devices and tablets.

## *Benefits:*

- No annual, monthly, or transaction fees.
  - No inventory required.
- Up to 25% commissions on all product sales.
  - Competitive prices for all products.
- North Coast handles all customer service inquiries.
- Full product warranties and our 100% Satisfaction & Return Policy for all sales.

# RxCart<sup>TM</sup> 2.0 *As easy as writing a prescription.*

RxCart<sup>TM</sup> 2.0 allows the therapist to specify the right products, with the proper size, weight, resistance level, and brand. Your clients no longer need to wander aimlessly through a confusing website hoping to get the right products with proper fitment. This puts the expert decisions in the hands of you, the expert.

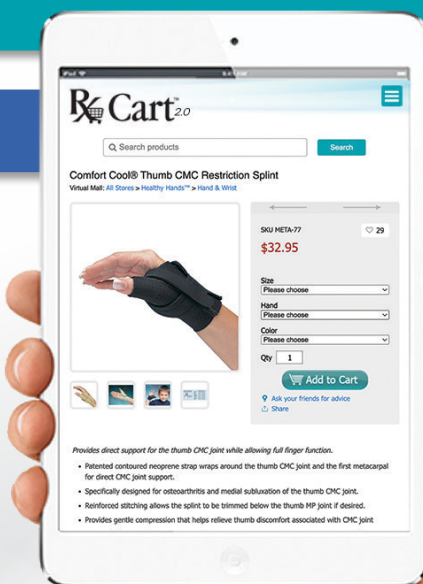

Harness the power of the therapist recommendation.

Simple to use on a tablet or smartphone while consulting with patients.

Makes it easy for your patient to get the specific therapy products you recommend.

## **Features include:**

- Analytics to track sales to the location and the therapist.
- Save the product bundles you recommend most.
- View status, send reminders for ignored RxCarts.
- Organizations can proactively track and influence therapist's behavior, and reward those who are using the tools best.
- Up to 25% commissions on all product sales.

You specify the products. Your patient clicks a link in their email.  
In just a few easy steps, patients purchase your list of recommended products.

Bring the power of Virtual Showroom<sup>TM</sup> into your daily practice.
