HAND SANITIZING SOLUTIONS

for a healthier you!

giovanni®
SKIN & BODY CARE

Moisturize and reduce germs and bacteria instantly with effective and high-performance hand sanitizing solutions.

Powerful, fragrance-free Hand Sanitizer is infused with nourishing antioxidant Vitamin E, Chamomile, and certified organic Aloe Vera.

Mixed Hand Sanitizing Towlettes send germs packing while soothing hands with certified organic oils of Grapefruit, Lavender, Peppermint and Spearmint. Available in conveniently packed travel sizes.

Refresh With Aloe Vera

A gentle solution for non-greasy skin care — hydrates and soothes while providing powerful antioxidants to help rejuvenate each pore.

Fight Bacteria With Ethyl Alcohol

The powerful 70% Ethyl Alcohol in our hand sanitizer gel helps eliminate germs — perfect for cleansing and refreshing at any time.

Nourish With Botanical Extracts

These cruelty-free hand sanitizers are infused with nutrient-rich botanical extracts to promote cleaner, healthier, and more vibrant skin.

Clean and Refresh Skin, Anytime, Anywhere!

ULTRA- ORTHO™

Multipurpose Orthotic

Provides wrist positioning and adjustability for both flexion and extension of the hand, wrist, thumb and digits.

Allows Metacarpophalangeal (MCP) joints to be placed into **extension** for extensor tendon injuries, or **flexion** for joint injuries.

C-BAR
Maintains webspace of thumb allowing a good sweeping position for adjustable abduction, extension and flexion.

"The Progress Ultra-Ortho is a functional solution for therapists and physicians. The orthotic is versatile and customizable for a wide variety of diagnoses, both orthopedic and neurological. The skilled craftsmanship and superior materials provide confidence knowing patients are getting a product that will therapeutically protect, progress, and meet all functional goals."

- Greg Pitts, OTD, OTR/L, CHT

The innovative design combines a malleable frame with dense foam padding for a lightweight, soft orthosis that supports like a moldable plastic splint.

Independent thumb strap allows custom adjustability for securing and supporting thumb in place.

All straps are fastened with a rivet to meet L-Code requirements. Each strap is rounded to prevent shearing and offer maximum comfort and control.

Ultra-Ortho™ is biomechanically designed to immobilize and offer adjustable support to meet a variety of therapeutic goals.

The orthotic is easily adjustable and does not cause any impingement or pressure areas when straps are fastened. This allows the orthotic to be used immediately for a variety of different types of pathologies maximizing the functional outcome and progress as needed without refitting for a new orthotic.

Applications include but are not limited to: contractures due to Dupuytren, head injury, stroke, spinal cord injuries, CVA, arthritic conditions or burns.

Direction of strapping
biomechanically controls the
hand, wrist, and forearm.

Left	Right	Size

ORTHO FOAM™

High Quality Economical Price

FINGER ORTHOTICS

Norco®

High-Force

PIP Extension Orthotic

PIP joint and tendon correction.

- Use to correct PIP extension lag, prevent volar plate stiffness, and protect injured extensor tendon.
- Contraindicated for fixed contractures, patients with fragile skin or severe edema.
- Heavy duty (0.047) black, stainless-steel wire construction. Easy to fit and bend wires to adjust extension force.
- Large closed-cell, contoured foam pads for improved fit.
- Not made with natural rubber latex.

Ortho Foam™ High-Force-PIP Extension Orthotic

	Size	DPC to DIP Length
NC85423-1	X-Small (AA)	2¼" (5.7 cm)
NC85423-2	Small (A)	2⅝" (6.7 cm)
NC85423-3	Medium (B)	3" (7.6 cm)
NC85423-4	Large (C)	3½" (8.9 cm)
NC85423-5	X-Large (D)	4" (10 cm)

To size, measure from the distal palmar crease to the distal finger crease (finger extended).

"The Ortho Foam High-Force PIP Extension Orthotic is the only product I've found that provides a superior biomechanics design that protects healing tissue, and maximizes patient comfort and functional outcome."

Smart Splint Pan

Sterilizes **99.99%**
of microbes using
high heat and UV light

- Touch screen user interface with parameter adjustability, thermoplastic sheet presets, user presets, auto on/off, education library and more.
- Transparent lid with accordion fold for visibility, heat maintenance and easy access to thermoplastic sheets.
- Heat cold water to precise thermoplastic temperature in less than 20 minutes.
- Automatic drainage pump for quick and easy water evacuation. A built-in water level sensor turns off the pan when water level is too low.
- Thermoset composite construction for durability, insulation, flammability resistance and aesthetic appeal.
- Recessed thermostat for safe and even heating.
- External Dimensions: 20" x 23" x 9" (51 x 58 x 23 cm).
- Tub Dimensions: 13" x 19" x 6" (33 x 49 x 15 cm).
- Glass height (fully raised) measures 9.5" (24 cm). Total height reaches 18.5" (47 cm).
- IEC61010-2 safety rating for hospital and international compliance.

Home screen with factory presets of thermoplastic sheet recommendations.

Create custom presets to fit clinician preferences and non-programmed thermoplastics.

INTRODUCING:

Preferred® Black

Preferred®

Our new, most versatile, non-stick splinting material can be used by novice or experienced users alike.

Resistance to Stretch

- Minimum to moderate resistance to stretch.
- Tolerates minimum to moderate handling during splint molding.
- Handle on a horizontal plane and form splint in a gravity-assisted position.
- Gentle, smooth motions yield superior results.

Drape

- Moderate drape with only light to moderate pressure.
- Contours are quick to form.

Memory

- Minimum to moderate memory.
- Splints can be modified a few times without thinning.
- Requires less handling and maintains contours while cooling.

Rigidity

- Molded splints have a **moderate rigidity**.
- A circumferential splint is flexible enough for easy donning and doffing, yet strong enough for immobilization.

Bonding

- The **unique NS coating** gives a slightly tacky feel that helps hold the material in place, without the material pulling or falling away.
- A wet bond will hold but can be pulled apart once cooled.
- Dry heating two surfaces will form a bond. For a permanent bond, use solvent minimally and dry heat prior to bonding.

Surface Finish

- **Moderate resistance to fingerprints** and resists showing stains.
- **Smooth, self-sealing** cut edges remain sealed even after reheating.

Applications

- 1/8" Preferred® Black can be used for almost any splinting application. Use for dynamic and static splinting; for adult and pediatric positioning; and for post-burn and post-surgical care.
- 3/32" Preferred® Black is thin and lightweight, yet strong, and can be used for forearm and hand-based splints. Ideal for arthritis splints, post-operative splints, and for pediatric splints.

Working Time (1/8")

- Allows three to five minutes to form and harden after softening in 160°F (71°C) water.

Not made with natural rubber latex.

Quality Products for Evaluation

Exacta™ Finger Pulse Oximeter

Accurate results in the clinic or at home.

- Dual color OLED screen displays SpO2, pulse rate waveform and pulse bar.
- Press the power button to easily change the direction of display.
- Anti-motion technology provides an accurate measurement.
- Resistant to interference by surrounding and man-made light.
- Measurement at low perfusion.
- Medical grade, FDA cleared.

NC87031 Exacta™ Finger Pulse Oximeter

*Dimensions: 2.24" x 1.3" x 1.2"
(57 x 33 x 30 mm)*

*Weight: 1.9 oz. (54g)
with batteries.*

*Includes two "AAA" batteries with
more than 18 hours operation.*

*Wrist strap
included.*

Wireless "On-the-Go" Technology

Intelligent iontophoresis.

Technologically advanced,
self-contained iontophoresis
drug delivery system.

- Fully self-contained.
- Intelligent biofeedback microprocessor.
- Hydrogel dispersive technology—no saline required.
- Patented "shut-off" technology.
- SmartPower™ LED.
- Detects and measures skin impedance to optimize drug delivery.

Active area: 11.4 cm²
Dosage: 40 or 80 mA*min
Skin Adhesive: Hypoallergenic
Maximum Buffer Capacity: Ag/AgCl Stabilizer
Fill Volume: 2.0cc
Smart Power: 6V with intelligent microprocessor
Packaging: 6 ActivaPatch® Kits, Alcohol Wipes,
Patient Information Cards
Treatment time: 2.5 Hours

ActivaPatch® IntelliDose™ 2.5

Iontophoresis Delivery Kit

Variety of sizes and shapes offer great flexibility for iontophoresis treatments.

- Made of non-sensitizing, hypoallergenic, medical grade materials.
- Delivers ions with a pH balance up to 80 mA-min.
- Maximum strength, precise buffering with unique carbon- Ag/AgCl technology.
- The highly absorbent drug matrix has no messy hydrogel.
- Large ground electrode surface area lowers sensation and increases comfort.
- Each kit contains 12 individual treatment sessions that include: one activity electrode; one return electrode; one alcohol prep pad.

Advanced, technology-based manufacturing for a thinner, more pliable electrode.

Any size

Not made with natural rubber latex.

Advantages

- More power than dual-channel devices for better penetration; up to 80 volts.
- Automatic current ramp-up and ramp-down for maximum comfort. Dose range from 0 to 80 mA-min with 0.1 mA-min increments.
- Time calculations are performed automatically and recalculated if dose and current settings are changed, or with pause/restart.

High-contrast display indicates dose, time and current.
