

MediBeads™ Microwave Moist Heat Packs

Natural, safe pain relief in minutes.

Durable, Reusable Packs are Safe and Easy to Use

MediBeads™ Packs are designed to provide comfort and superior contact as they conform to body contours. Each pack contains specialized beads that, when microwaved for one or two minutes, provide time-released moist heat for a safe and effective treatment session. No water or towels are needed. When removed from the microwave, the temperature of the MediBeads™ does not increase. This prevents inadvertent burns, which frequently occur with gel filled packs as the temperature continues to rise.

Available in multiple sizes to accommodate a variety of needs, MediBeads™ are economical and effective for home therapy use.

MediBeads™ Rejuvenate Themselves Naturally

After treatment, the unique beads contained in each MediBeads™ pack rejuvenate themselves by recovering moisture from the air. A permanent, natural anti-microbial agent in MediBeads™ inhibits odors, mildew, dry rot and bacteria buildup, resulting in clean, odorless moist heat. MediBeads™ are nontoxic and environmentally safe. Hand washable and latex free.

A doctor should be consulted before using MediBeads™ in cases of circulatory problems or diabetes. Use adult supervision for young children or elderly persons.
