We Proudly Support Our War Heroes

With the increase in survival rates among those severely injured at war, we at North Coast Medical understand the need to honor our heroes by supporting causes dedicated to administering to their needs. It is for this very reason we provide discounts to our military medical facilities for rehabilitation products and donate a portion of those sales to the Wounded Warrior Project. Quite frankly, we believe affordability ultimately maximizes rehabilitation outreach.

It is with great pleasure that we salute our heroes and acknowledge their efforts to guarantee the freedom of our country.

The Wounded Warrior Project focuses on mending the mind and body of those returning from service with injuries and/or illnesses. Together with programs aimed at providing economic empowerment, the Wounded Warrior Project assists our service members and their families assimilate back into civilian life.
