SECTION 7 NOTES:

---

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

---

**ENGINEERING CONTROLS:** In those cases where engineering controls are indicated by the use conditions, the following traditional exposure control techniques may be used to effectively minimize employee exposure: local exhaust ventilation, enclosed system design, process isolation and remote control in combination with appropriate use of personal protective equipment.

**RESPIRATORY PROTECTION:** Due to the physical state of this material, inhalation is unlikely to occur.

**EYE PROTECTION:** Eye contact should be avoided. In industrial situations, chemical safety glasses, goggles or a face shield should be selected with regard to use condition exposure potential

**SKIN PROTECTION:** A single relatively short exposure causes no known adverse effect. Several repeated prolonged exposures (24 to 48 hours) may irritate

**OTHER PROTECTIVE CLOTHING OR EQUIPMENT:** Use Standard protective equipment and clothing

**WORK HYGIENIC PRACTICES:** All food should be kept in a separate area away from the storage/use location. Eating, drinking and smoking should be prohibited in areas where there is a potential for significant exposure to this material. Before eating, hands and face should be thoroughly washed.

**EXPOSURE GUIDELINES:** No exposure limits has been established for this material.
